

PROPOSITION S - APRIL 2, 2024

STORMWATER

PROPOSITION S will decide whether voters want MSD Project Clear to address growing, region-wide flooding and erosion problems fueled by climate change. There is currently no funding for regional stormwater solutions.

PROPOSITION S is a response to thousands of flooding and erosion problems reported by MSDPC customers. These stormwater problems are already more than the region's natural and constructed stormwater systems can handle. They are also beyond most homeowners' technical and financial capabilities and require the resources of a regional entity, like MSD Project Clear, to resolve.

A "YES" VOTE

- NEW regional flooding and erosion services
- Begin work on thousands of known problems
- \$25 per year for a typical customer

A "NO" VOTE

- NO regional flooding and erosion services
- Stormwater problems will not be addressed
- No new cost
